This brief study is the second in a series of analyses of the student body of the Pensacola Junior College. The data presented are limited to the present evening college enrollment. The material involves 1,024 of the 1,094 students enrolled for the fall semester of the 1960–61 school year. A similar study was made for the day college in November of 1960.

PENSACOLA JUNIOR COLLEGE

February 14, 1961

This study is the second in a series of analyses of the student body of the Pensacola Junior College. The data presented are limited to the present evening college enrollment. However, a similar study was made on November 18, 1960, for the day college.

The material involves 1024 of the 1094 students enrolled for the Fall Semester of the 1960-61 school year.

It is the hope of the administration that a similar study will be made at three year intervals.

PENSACOLA JUNIOR COLLEGE

PERCENTAGE OF (1) TEACHERS IN CLASS, (2) STUDENT BODY IN CLASS, AND (3) STUDENT BODY ON CAMPUS.

PENSACOLA JUNIOR COLLEGE

December 2, 1960

COMPARISON OF SPECIAL ROOM AND REGULAR ROOM USE

The designation "Special Room" as used in this study applies only to rooms not readily adaptable to regular classrooms. Special or Laboratory classes meeting in a regular classroom (i.e. room without special equipment) does not cause the room to be categorized as a "Special Room".

None of the special areas of the Library was included. However, the special areas of the Health Building were considered.

TOTAL CONTACT HOURS IN SPECIAL AND REGULAR ROOMS

	Regular	Special	Total	% Special
Monday	3,192	895	4,087	22
Tuesday	1,648	1,414	3,062	46
Wednesday	2,962	1,180	4,142	29
Thursday	1,630	1,356	2,986	45
Friday	3,083	893	3,973	23
Totals	12,515	5,738	18,250	31.4% Special

SPECIAL AND REGULAR ROOM RATIO

	Regular	Special	Total	% Special
Monday	119	60	179	33
Tuesday	68	68	136	50
Wednesday	110	71	181	39
Thursday	60	74	140	53
Friday	113	48	161	30
Totals	476	321	797	40.3%

The study indicated that 31.4 per cent of the total contact hours employed the use of special areas. However, the restrictive nature of special classes caused 40.3 per cent of the classroom use to be devoted to special classes.

Assuming the Fall Semester to be a "normal" situation, the college should plan for either: (1) approximately 31.4 per cent of the contact hours to be in "Special Areas", or (2) plan for a ratio of four "Special Areas" for every six regular classrooms.

PENSACOLA JUNIOR COLLEGE PARKING FACILITIES

December 2, 1960

There are four paved parking areas on the campus providing facilities for 502 automobiles. In addition to the designated areas, unpaved, off-street parking is available to an almost unlimited degree.

A car check was made on seven occasions and the number of automobiles was compared to the number of people on campus at that particular time. A rough percentage of campus population bringing cars to the campus was calculated on this basis.

Car Check	Students on Campus	Faculty, Staff & Civil Service	Total Possible Automobiles	Percentage of Automobiles to Population
A.M. 403	843	128	971	41.5%
P.M. 384	574	128	702	54.7%
A.M. 622	955	128	1083	57.6%
P.M. 376	703	128	831	45.2%
A.M. 466	807	128	935	56.9%
P.M. 392	561	128	689	56.7%
A.M. 491	931	128	1059	46.4%

It appeared that as much as 89% of the student enrollment was on campus at one particular time. These plus the rather constant figure 128 consisting of Civil Service and Faculty members gave the campus a population peak of 1,083. The survey revealed that 622 or 57.6% of these had automobiles on the campus at peak periods. Since the parking should be prepared for the peak population load, the Pensacola Junior College had a shortage of 120 paved parking spaces.

The possible peak campus population is 1,206 (1,080 students, 75 Faculty and Staff, and 51 Civil Service workers). On the basis of this number and the peak campus parking (622) there would need to be .51 parking spaces for each possible person on campus, or 1 parking space for every 2 persons. On the basis of the actual peak population on campus the ratio should be .57 parking space for each person.

1. Percentage of Student Body in Class (straight line)

The Day College operates eight class periods per day, five days a week. These forty class periods had an average of 479 students (44.4% of the student body) in class. The percentage of students in class ranged from a high of 752 or 70% of the enrollment (Wednesday 10:00 AM) to a low of 79 students or 7% of the enrollment (Friday 3:00 PM).

2. Percentage of Student Body on Campus (dotted line)

In addition to the students in class, there were always a number of students on campus in various non-class situations. For the forty class periods of the week there was an average of 678 students on campus each class period. This number ranged from a high of 955 students or 89% of the student body (Wednesday 10:00 AM) to a low of 161 students or 15% of the student body.

Excluding the final class hour each day, a minimum of 47% of the student body was on campus during the entire school week.

A comparison of the figures for student body in class and student body on campus indicated that there was an average of 199 students on campus every class period who were not in classroom situations.

3. Percentage of Instructors in Class (dash line)

No more than 58% of the instructional staff was employed in a classroom teaching situation at any one period (Wednesday 10:00 AM). An average of 33.4% of the instructional staff was employed each class period of the week.
